

12-Point Audit For Public Safety Agencies

Is your public safety or law enforcement agency providing the best possible protection to your team and those you're sworn to serve? This 12-point audit will help you know where you may have room for improvement in equipment provisioning, interoperability, or connectivity.

Equipment Provisioning

1

Is there enough equipment for all active duty personnel, temporary staff, and backup equipment?

2

Does your equipment provide first responders with voice, data, and video capabilities?

3

Can your equipment be monitored, configured, and managed remotely?

4

Does your equipment trigger automated responses and actions, such as activating voice and video recording when firearms are removed from holsters or turning on video surveillance when officers leave their vehicles?

5

Are your facilities secured with video and access control systems to prevent intrusion and monitor staff and visitors?

6

Do you have remote monitoring and tracking capabilities for your fleet of vehicles?

7

Is your agency equipped with License Plate and Facial Recognition capabilities?

Interoperability

8

Is new equipment able to be easily added to your existing system?

9

Does your equipment easily integrate with the systems used by nearby jurisdictions or state/federal agencies?

Signals and Compliance

10

Is the agency connected to the national first responder network, FirstNet?

11

Are there any significant areas of interest throughout the jurisdiction with insufficient cellular and/or radio signals?

12

Do your network capabilities - including radio, cellular, and wireless - meet local and state/federal regulations and requirements?

If you answered “no” to any of these questions, please contact MCA at 844-697-0280 for a full agency audit to learn more about how to keep your teams safe and connected. MCA is your trusted advisor for wireless communications, data, and security solutions for Public Safety and Emergency Management Agencies.
